

EDUCATION AND SCHOLASTIC ACHIEVEMENTS				
Program		Institute	CGPA/%age	Year
M.Tech in Data Science and AI		Indian Institute of Technology Madras	9.27 till sem 1	2025-2027
B.Tech in Information Technology		Rajarshi Shahu College of Engineering, Pune	9.47	2021-2025
Coursework	Machine Learning, Deep Learning, Modern Computer Vision, MLOps (Machine Learning Operations), Optimization for ML, Mathematical Foundations of Data Science, Data Structures for Data Science.			
Scholastic Achievements	GATE DA AIR-38, with a GATE score of 850. Top 0.07% nationwide (99.93 percentile).			
WORK EXPERIENCE				
Bajaj Auto, Pune <i>Data Science Intern</i> <i>May 2026 - July 2026</i>	AI & Data Science Intern, Digital Tech, Bajaj Auto Ltd. Contributing to the organization’s transition toward an AI-first operating model by developing a scalable enterprise AI platform based on the Model Context Protocol (MCP) and agent-driven workflows. Designed and implemented secure integrations with enterprise databases, analytics systems, and business services, along with dynamic tool registration, audit logging, health monitoring, workflow orchestration, and an AI-powered conversational interface capable of executing business actions and generating analytics dashboards through a modular, extensible architecture.			
ACADEMIC EXPERIENCE				
IIT Madras <i>Teaching Assistant</i>	- DA5000W - Mathematical Foundations for Machine Learning, Prof. Jayadev P and Prof. Ramkrishna Pasumarthy - DA5401W - Foundations of Machine Learning, Prof. Jayadev and Prof. Nirav Bhatt - DA6002W - Online and Reinforcement Learning, Prof. Surya Sankagiri and Prof. Jayadev <i>Assisted professors in problem design, examination conduction, evaluation, programming and conducted concept tutorials for students.</i>			
PROJECTS				
Learning to Rank under Context Effects, <i>Master’s Thesis</i> <i>IIT Madras, 2026</i>	<i>Learning to Rank under Context Effects</i> Working under Dr. Suryanarayana Sankagiri, Wadhvani School of Data Science and Artificial Intelligence, IIT Madras. Towards the completion of my Master’s thesis. Working on building models that can better understand context effects in choice data that comes up in information retrieval (i.e., LTR setting).			
Competency Assessment, <i>Project/Study</i> <i>2026</i>	<i>Retrieve then Tag: A Two-Stage Approach to Automatic Competency Tagging of Mathematics Questions</i> (Under Dr. Shabana KM (IIT Madras)) Competency-based education requires assessment items to be mapped to the specific competencies they are designed to test, enabling precise measurement of student learning. Constructing such mappings manually is labour-intensive, motivating the need for automatic competency tagging. We study this problem for Classes 6–8 mathematics questions across a fine-grained label space of 95 competencies. We evaluate three LLMs under four prompting strategies, and compare against retrieval-based methods using fine-tuned sentence embeddings augmented with SLM-generated method hints. Our results show that frontier LLMs perform strongly on direct tagging, while retrieval achieves R@5 exceeding 0.92 in the best settings. We propose a two-stage pipeline combining embedding-based retrieval for candidate shortlisting with LLM-based tagging over the shortlist, which consistently outperforms either approach used in isolation.			
3D Gaussian Splatting Super-Resolution <i>Course Project: EE5178: Modern Computer Vision</i> <i>2026</i>	3D Gaussian Splatting Super-Resolution Challenge Developed a hybrid 3D-aware super-resolution pipeline for reconstructing high-resolution novel views from low-resolution multi-view scene representations in a competitive computer vision challenge organized by Prof. Kaushik Mitra. Combined 3D Gaussian Splatting and COLMAP-based scene reconstruction with a Real-ESRNet x4 enhancement pipeline, incorporating geometric test-time augmentation (rotations/flips), ensemble averaging, and adaptive routing between 3D and 2D restoration workflows. Designed a blending strategy that fused AI-generated outputs with bicubic interpolation to improve structural consistency and SSIM stability across viewpoints. Achieved 3rd place in the internal course Kaggle competition, obtaining a private leaderboard score of 0.8713 and a public leaderboard score of 0.8060 . Tech Stack: Python, 3D Gaussian Splatting, COLMAP, Real-ESRNet, OpenCV, Computer Vision. https://www.kaggle.com/competitions/ee-5178-3-d-gaussian-splatting-super-resolution-challenge			

MLOps Project <i>Course Project, DA5402: Machine Learning Operations 2026</i>	End-to-End MLOps Pipeline for Deer Image Classification Designed and deployed a production-grade MLOps pipeline for binary image classification (deer vs. non-deer), integrating DVC for data and pipeline versioning, MLflow for experiment tracking, Apache Airflow for workflow orchestration, and Docker-based deployment. Built a FastAPI inference service and Streamlit frontend, with automated retraining triggers, model version management, and CI-style testing. Implemented end-to-end observability using Prometheus and Grafana for latency and system monitoring, achieving 98.02% accuracy, 97.06% F1-score, and an average inference latency of 11.7 ms across 100 runs. Tech Stack: Python, DVC, MLflow, Apache Airflow, FastAPI, Streamlit, Docker, Prometheus, Grafana, PyTest. https://github.com/uhloofstardust/da5402-deer-mlops-pipeline
System Hardening, Project 2023	<i>GUI-based utilities for Server Hardening in Ubuntu</i> - Built GUI-based Linux server hardening toolkit with modules for firewall, patching, logging, and access control - Implemented remote logging and security utilities to improve system monitoring and auditability https://github.com/uhloofstardust/sys-hard
POSITIONS OF RESPONSIBILITY/VOLUNTEER WORK	
Placement Core, MTech Data Science & AI <i>IIT Madras, 2026-27</i>	- Core, Placement Team, M.Tech Data Science and Artificial Intelligence, IIT Madras - Lead a team of Placement Coordinators and Deputy Placement Coordinators to manage placement and internship activities for the department. - Coordinate recruiter outreach, company engagement, student preparation, resume reviews, and placement operations. - Collaborate with institute placement leadership, faculty, alumni, and industry stakeholders to expand recruitment opportunities and improve placement outcomes.
Section Leader (Mentor), Stanford Code in Place <i>2024, 2025</i>	- Led a section of 15+ students through a Python fundamentals course. - Taught Python content, helped students with mini projects. https://digitalcredential.stanford.edu/check/F1AE566089AF92CCD665E410A12EDBA3B066C99B52727A25FB0AF53942C3B8A9ZEZUbG8yclprZmhvQTVtWIVGV3Fhc0tCNnB2NEtzRTc2Q29IbVQrRHLwTG1ERW1h https://digitalcredential.stanford.edu/check/DEA66D9DFEF8013593C096D2EF8419A5BE4D5185AC38C02FF5E091F8592A032DS21KZVNDYnU1ell2NIhK1VQcURpQXhtZ3VIY2I4OVhZNVhKeHJqdGo1d01KZ2gz
SKILLS	
Languages	Python, SQL;
ML/AI	PyTorch, Scikit-learn, LangChain, MCP, LLMs, RAG
MLOps	Git, DVC, Docker, MLflow, etc.
EXTRA-CURRICULAR ACTIVITIES	
Activities	Tutored students for GATE DA, 2026.
Interests	Reading, cooking, writing postcards and letters
